## SUMMARY

---

Results Driven software developer with **3+ years** of experience building **responsive**, **accessible** web applications using **React**, **JavaScript**, **PHP**, and **SQL**. Developed a **region-wide** restaurant **performance dashboard** at Nando's, **saving hours** of manual reporting and **improving decision-making**. Seeking a React developer role to leverage **technical** and **problem-solving skills** within a dynamic tech team.

## TECHNICAL SKILLS

---

**Frontend:** HTML5, CSS3, JavaScript (ES6+), React, jQuery, Responsive Design, Accessibility (a11y), Figma, Bootstrap, Tailwind CSS, TypeScript

**Backend:** PHP, SQL, REST APIs, Supabase

**Other:** Git, GitHub, Next.js, TypeScript (familiar), Lua, Jira, Agile practices, NPM, Chrome Dev Tools, Playwright

## PROJECTS

---

### Nando's Performance Dashboard

**Custom web application** deployed across multiple restaurants, **automating** performance reporting.

- Gathers **weekly** data (NPS, KDS, sales, inaccurate items, wages, etc.) from internal systems.
- Generates **weekly** and **4-week reports** with manager **performance tracking** and **visual tables**.
- Saves managers **hours weekly**, **reduces errors**, and supports **data-driven decisions**.
- Adopted **region-wide**, praised by Regional Manager.

### London Tech Events

**Full-stack web app** aggregating London-based tech events with **React**, **Playwright** and **Supabase**.

- Gathers event data from Eventbrite & Meetup using **Playwright**, stored in **Supabase**.
- Features **intelligent tagging**, **advanced filtering**, **infinite scrolling**, and **OAuth authentication**.
- **Responsive UI** with **TailwindCSS**, optimized for mobile & tablet devices.
- Showcases **full-stack** skills in **React**, **SQL**, and **web scraping**.

### Country Explorer Web App

**Interactive single-page app** to explore global country data.

- **Fetches real-time data** from public **APIs** (news, flags, weather) using **JavaScript** & **JQuery**.
- Built with **HTML**, **CSS**, and **mobile-first** design principles.

### Company Directory App

**Responsive** personnel database with **search**, **filter**, & **CRUD** functionality.

- Backend in **PHP** & **SQL**, frontend with **JavaScript** & **AJAX** for dynamic interactions.
- **Clean, intuitive UI** with real-time search and filter features.

## EXPERIENCE

---

### Software Developer | Nando's

July 2025 – Present

- **Designed & developed** a restaurant performance dashboard used **region wide**.
- **Automated reporting**, reducing processing time from **hours to under 3 minutes** weekly.
- Delivered **user-friendly interfaces**, **minimizing human error** for store managers.
- **Troubleshoot** in-store systems and implemented **process improvements**.

### Community Manager | Volunteer

2024 – Present

- **Organized** events for a **200+ member** online community, earning a **leadership** role within **two months**.

### Coding Traineeship – Full Stack Developer | IT Career Switch Ltd

Jan 2023 – Dec 2023

- Completed **intensive full-stack training**, building responsive apps with **React**, PHP, and SQL.

### BSc Games Programming | Bournemouth University

Sept 2015 – July 2019

- Achieved a **Diploma of Higher Education with Merit**
- **First-class** marks in **Software Programming** (**90%** and **99%** in Year 1 and 2)
- **Strong** foundation in **C++**, **C#**, game logic, **systems design**

## INTERESTS

---

I love building things — whether it's **frontend features**, **game mods**, or **tabletop strategies**. I also enjoy the **gym**, **painting** and **music**.
